Independent Learning Task

Name: _____

Science Group: _____

Summer Term

Year 9

Aims of task: The aim for this task is to develop your knowledge and understanding of the effects of force on the speed of a falling object. You need to produce a leaflet for a Skydive Experience company. You are writing for nervous customers.

Instructions:

Please refer to the accompanying pupil sheet. You either have sheet 1a or sheet 1b. Sheet 1a is for students working at level 4-5. Sheet 1b is for students working at level 5-7. These will be given out at the discretion of your teacher depending on your level of attainment.

Please also refer to the level ladder so you understand clearly how to achieve each level.

Your completed independent learning tasks must be handed in on:

Date due: Monday 7 June 2010

If you have any difficulties with any of the activities in this unit, please see your Science teacher at the earliest possible opportunity. Your work must be handed in on the date given above.

Good luck with this independent learning task!
