Independent Learning Task

Name: _____

Science Group: _____

Spring Term

Year 7

Chemistry

Aims of task: The aim for this task is to develop your knowledge and understanding of the action of medical drugs in the body. You will produce an information leaflet, to be put in a tablet box of a new drug. Your leaflet must explain how the drug works and why we need the drug. You will need to decide on an appropriate and informative way to design your detailed leaflet.

Instructions:

You will find your task sheet and your level ladders. You will have to make a decision which level you want to aim for, and make sure you fulfil the criteria mentioned.

Your completed independent learning tasks must be handed in on:

Monday 22nd March 2010

If you have any difficulties with any of the activities in this unit, please see your Science teacher at the earliest possible opportunity. Your work must be handed in on the date given above.

Good luck with this independent learning task!
